

Gas Prices Over Time

When was the price of gas increasing?

When was the price of gas decreasing?

Notice how the answers to those questions are just intervals of x -values. There is no mention of what the price actually is.

Increasing, Decreasing and Constant

It works the same way for all graphs.

Going from left to right:

- Increasing: intervals of x -values in which the graph is going up
- Decreasing: intervals of x -values in which the graph is going down
- Constant: intervals of x -values in which the graph is staying flat

	<p>Increasing:</p> <p>Decreasing:</p> <p>Constant:</p>
	<p>Increasing:</p> <p>Decreasing:</p> <p>Constant:</p>
	<p>Increasing:</p> <p>Decreasing:</p> <p>Constant:</p>
